

Report to the State Board of Education
on the
Status of Minority Teachers in Tennessee

Compiled by the
Tennessee Department of Education

Lana C. Seivers, Commissioner

Morgan E. Branch, Director
Minority Teacher Recruitment and Retention

August 2003

Minority Teacher Recruitment and Retention in Tennessee

THE BACKGROUND

In 1987, the State Board of Education cited a shortage of minority teachers in Tennessee. In 1988, The Tennessee Task Force on the Supply of Minority Teachers issued several recommendations—most of which were implemented—to increase the number of minority teachers. In 1989, House Joint Resolution 36 also requested an annual report on the status of minority teachers be submitted to the Senate and House K-12 Education Sub-Committees of the Tennessee General Assembly. Legislation was adopted in 1993 urging each local board of education to establish reasonable, incremental goals for the recruitment, employment, and retention of African-American teachers in numbers which reflect the percentage of African-Americans within the community served by the local education agency.

THE NEED FOR MINORITY RECRUITMENT AND RETENTION

The student population of Tennessee schools during the 2001-02 school year was 909,746. An analysis of the racial composition of Tennessee public school students reveals that 24.81% were African-Americans. Table 1: Racial Composition of Tennessee Public School Students details a statistical history since 1992-93. The enrollment of African-American students varies from system to system. Eighteen of the state's 138 school systems have an enrollment of African-American students greater than the state's African-American student population. These systems are reported in Table 2: Tennessee School Systems Whose African-American Student Enrollment Is Above 24.5%. Four systems report no African-American students as shown in Table 3: Tennessee School Systems With No African-American Students. Twenty-six school systems report no African-American classroom teachers.

Of the 57,164 classroom personnel, 5,891 were African-American in the 2001-02 school year. However, these data understate the actual number and percent of black educators, because 19.96% (11,408) of the active classroom personnel reported race as unknown. The 1999-2000 school year was the first year since 1985 that the percentage of African-American classroom personnel did not decline. The percentage of African-American teachers for the 1998-99 and 1999-00 school years was 9.9%. For the 2001-02 school year, as with last year that the percentage increased. The percentage of African-American for 2001-02 was 10.81%, an increase of .3% over last year. Table 4: Tennessee Classroom Personnel is a statistical history of classroom personnel since 1984-85.

Comparing the percentage of African-American students to the percentage of African-American educators, fifty-four school systems reflect an African-American student/teacher differential of greater than five percentage points. The percentage of the

teacher work force compared to the student population in school systems in Tennessee with more than a 5% differential is reported in Table 5: Percent Of Teachers To Students In Tennessee With More Than 5% Differential.

Additionally, a significant number (706) of African-American classroom educators have 30 or more years of experience. These teachers represent 11.98% of the total African-American classroom teachers. Table 6: Teachers with 30 or More Years Experience details the statistical history since 1984-85. As these educators retire, the efforts to achieve equitable employment levels will be further complicated. Table 7: Teachers with 30 or More Years of Experience by System gives the status of possible teacher retirement in each system.

NEW HIRES

A total of 5,369 educators were “new hires” for the 2001-02 school year of which 10.15% (545) were African-American. New hires include those with no previous teaching experience as well as those who are returning to the teacher work force. However, it should be noted that the proportion of new hires for which race is unknown was 22.90%. Procedures for capturing the data are under revision, so that more accurate data may be obtained. Historical data is provided in Table 8: African American New Hires.

TEACHER EDUCATION ENROLLMENT

The data representing teacher education enrollment is based on those students considered enrolled in the teacher education program. Most or all of these students have completed two years of college and have been admitted to the teacher education program for that institution. Enrollment of African-Americans in Tennessee’s teacher preparation programs has increased since 1987 when only 78 of a total of 3,529 were African-American. Enrollment data for the fall of 2002 indicated that 506 African-Americans were enrolled in teacher education programs, 266 at public institutions and 240 at private institutions. A historical perspective can be gathered from reviewing Table 9: Teacher Education Enrollment.

Of the public institutions, the University of Memphis has the largest number (87) of African-American teacher education students followed by Tennessee State University with 52 African-American enrollees. Of the private higher education institutions reporting, Christian Brothers has an enrollment of 142 African-American students followed by Freed-Hardeman University with 34 African-American teacher education students. Table 10: Fall 2002 African-American Enrollees Seeking Initial Teaching Licensure At Public And Private Institutions shows the enrollment at each institution. TABLE 11: Enrollees in Initial Teacher Licensure Program: Fall 2001 and 2002 compares the enrollees for 2001 and 2002 and indicates a decrease in teacher education enrollment.

TEACHER EDUCATION COMPLETERS

A person who has met all the requirements of an institution's state-approved teacher preparation program. Program completers may include all those who are documented as having met such requirements. Documentation may take the form of a degree, institutional certificate, program credential, transcript or written proof of having met the program's requirements. In applying this definition, the fact that an individual has or has not been recommended to the State Office of Certification and Licensure for initial certification or licensure may not be used as a criterion for determining who is a program completer.

Source - State of TN Dept of Education "Plan for Reporting on the Quality of Teacher Preparation Programs" October 2000

In 1988, African-American teacher education graduates had reached an all-time low -- 45 out of a total of 1,543 (2.9%). Last year, 2002, African-American teacher education program graduates numbered 378 (11.6%). The total number of completers (all demographic race categories) in 2002 was 3,264 compared to 1,543 in 1988.

African-Americans accounted for 11.8% of the completers from public institutions. TABLE 12: Teacher Education Completers of Initial Licensure lists the year by year graduation numbers.

The University of Memphis had the largest number of African-American educators, 143 completers, with Tennessee State University following with 33 completers. Of private institutions, Freed-Hardeman University had the largest number of African-American completers, 45. Christian Brothers University was next with 32 completers. TABLE 13: Teacher Education Completers lists the completers of initial teacher licensure from each institution. Table 14: is a comparison of completers for the past two years.

Recruitment of these individuals represents an important opportunity for local school systems to increase their African-American teacher work force. Each year the Department of Education with the cooperation of the various institutions sends a list of prospective graduates to each school system.

The Office of Teacher Licensure began collecting data on teacher licensure in 1999. From July 1, 2001, to June 30, 2002, 13,633 licenses were issued with the "date of original issue," falling between the dates listed. Of those 13,633, 1,859 or 12.74% were issued to African-American educators. However, it must be noted that 3,843 (28.19%) of these licensees listed race as unknown or other. TABLE 15: Licenses with 'Date of Original Issue' Falling Between 07-01-2001 & 06-30-2002 shows the number issued by certificate type and race.

EFFORTS TO RECRUIT NEW TEACHERS

Scholarships and Grants

Increased minority enrollment at public and private institutions is due in part to the financial incentives of the Tennessee Student Assistance Corporation's Minority Teaching Fellows Program, Tennessee Teaching Scholars Program and the Tennessee Higher Education Commission's Minority Teaching Education Grant Program.

The Minority Teaching Fellows program presently funds its maximum number of students of 116. Approximately 25-30 students graduate from this program each year.

The Tennessee Teaching Scholars Program managed by the Tennessee Student Assistance Corporation awarded 201 scholarships under this program. Of those, 19 were awarded to African-American students.

The Minority Teaching Education Grant Program focuses on the recruitment by the colleges and universities in partnership with local education agencies of non-teaching personnel, teacher-aides, substitute teachers, and persons changing careers into the teaching force.

Partnerships

PASS - Partnerships To Assist School Success

Another program that is having an impact on enrollment is the Partnerships To Assist School Success (PASS) program. This joint program between the Tennessee Department of Education and the Tennessee Education Association was designed to identify and encourage high school minority students to enter the teaching profession. The participants in the program include local school systems, higher education institutions, churches, and businesses.

Workshops are an important component of the PASS program. The workshops are provided to make the students and others in the community aware of the scholarships and loans that are available to minority students who plan to enter the teaching profession. The Tennessee Student Assistance Corporation was also part of these workshops.

Tennessee Student Assistance Corporation

The Tennessee Student Assistance Corporation conducts financial aid workshops across the state. Information concerning the teacher education

scholarships is disseminated during these workshops along with other financial aid information. Approximately 50 workshops were conducted this past year.

Troops to Teachers

Another source of prospective teachers is the Troops to Teachers Program (TTT.) Under this program, military personnel including members of the National Guard and Reserve have the opportunity to begin a new career in public education. The TTT Program began in 1994 as a transition assistance program. The Defense Authorization Bill of 2000 moved responsibility to the Department of Education. Currently the program is included with the "No Child Left Behind Act of 2001" and provides financial assistance to eligible veterans, the program extend thru FY 2006. The program purposes are to:

1. Recruit quality teachers for schools serving low-income and families in poverty;
2. Help relieve teacher shortages, primarily in math, science, and special education;
3. Assist military personnel transition to second careers as teachers in K-12 public schools.

Currently 135 teachers have been hired from the Troops to Teachers Program. Of those 135 teachers, 35 are African-American, three Hispanic, and three American Indian.

LOCAL RECRUITMENT OF MINORITY EDUCATORS

Legislation passed in 1993 urges each Tennessee local board of education to establish reasonable, incremental goals for the recruitment, employment, and retention of African-American teachers in numbers that reflect the percentage of African-Americans within the community served by the local education agency and submit the plan to the Department of Education.

Eighty-five school systems responded to the request for information regarding their plans. The responses fall into four categories:

<input type="checkbox"/> Our school system reflects an African-American student/teacher racial imbalance less than five (5) percent. No plan is attached.	48 Systems responded to this option.
<input type="checkbox"/> Our school system reflects an African-American student/teacher racial imbalance less than five (5) percent. A plan is attached.	10 Systems responded to this option.

<input type="checkbox"/> Our school system reflects an African-American student/teacher racial imbalance greater than five (5) percent. A plan is attached.	54 Systems had greater than 5% imbalance last year. 25 Systems responded to this option.
<input type="checkbox"/> Our school system is under court order to maintain student/teacher racial balance. A plan and copy of the court order is attached.	2 Systems responded to this option.

In part of this plan, local systems identify strategies for recruitment and retention. The most frequently identified strategies for recruitment are:

1. Recruit from historically black colleges and universities in Tennessee and surrounding states. Many have also expanded their recruitment efforts from regional to nationwide.
2. Communicate with minority graduates identified annually by the Tennessee Department of Education as having completed a teacher education program in Tennessee.
3. Attend job fairs on various college and university campuses.
4. Invite candidates to visit the school system and community and pay their expenses.
5. Offer qualified applicants all of their earned teaching experience as recognized by the Tennessee Department of Education.
6. Use the Troops to Teachers program.
7. Encourage high school graduates to enter education as a career.
8. Provide support for minority teachers on waivers to obtain teaching credentials.
9. Establish a committee of educators and community leaders to plan activities and strategies to assist in the recruitment of minority teachers.
10. Offer system sponsored scholarships.

SPECIFIC LOCAL STRATEGIES FOR RETENTION ARE:

1. Establish new teacher networks.
2. Provide enhanced staff development.

3. Assign mentors to assist new teachers adjust to the district.
4. Continuously assess the needs of the new teachers.
5. Provide social support and community orientation.
6. Assign a community volunteer to involve the new teacher in community activities.
7. Provide support for minority teachers to obtain an advanced college degree.

SPECIFIC PROBLEMS HINDERING SYSTEMS IN THE RECRUITING AND RETENTION EFFORTS:

Low teacher salaries.

Lack of incentives for enticing candidates.

Lack of candidates wanting to teach in some areas of the state.

EFFORTS BY THE DEPARTMENT OF EDUCATION TO RECRUIT AND RETAIN MINORITY TEACHERS

A. The State Department of Education continues to assist systems in the recruitment and retention of minority teachers through the following:

1. Coordinating efforts associated with reporting to the State Board of Education and improving data collection.
2. Developing a list of prospective minority teachers and distributing it to all Tennessee school systems on an annual basis.
3. Urging all school systems to submit a plan to the Department of Education concerning the recruitment and retention of African-American teachers.
4. Increasing efforts to assist school personnel, guidance counselors, and principals making all students more aware of the teaching profession and its benefits and rewards.
5. Providing of a website for job information. Teach in Tennessee is the State of Tennessee's web resource for posting and viewing employment vacancies in Tennessee PreK-12 public schools.

6. Partnering with Teachers-Teachers.com. The Tennessee Department of Education has partnered with Teachers-Teachers.com to provide all 138 Tennessee school systems access to the Internet's premier education recruitment service. This partnership enables Tennessee school systems to search the Teachers-Teachers.com database of over 43,000 resumes, post an unlimited number of positions and hire an unlimited number of teachers for absolutely no cost.

B. Efforts should be made to increase the pool of minority teachers through:

1) Increasing funds for the grant/scholarship programs:

- a) **Minority Teaching Education Grant Program.** Currently the program receives \$255,000, which is allocated to institutions of higher education with well-developed institutional support for minority candidates. All of the funds are used directly to support candidates. Efforts to expand the grant/scholarship programs should be continued, since they have clearly demonstrated the capacity to do so.
- b) **Minority Teaching Fellows Scholarship Program.** Currently 116 students are served by this four-year program, producing from 25-30 graduates each year. Applications for the 2003 scholarships numbered 69. Of those 69 applications, 18 new scholarships were awarded this year.

2) Recruiting, retaining, and licensing individuals in the shortest amount of time.

3) Heightening overall institutional minority recruitment and retention efforts by having a specific person in charge on at least a part-time basis.

4) Providing resources for the students served by the programs.

5) Increasing the networking between Future Teachers of America and PASS chapters with higher education institutions

6) Developing a relationship with the Governor's School on Prospective Teachers and encouraging them to enter the teaching profession.

7) Improving communication among the Colleges of Education, Local Education Agencies, Tennessee Higher Education Commission, Tennessee Education Association, and the State Department of Education as to scholarships and other grants available to prospective minority teachers.

DATA ON OTHER MINORITIES

Hispanic

The Hispanic population of our state has and is increasing. During the 2001-02 school year the percent of Hispanic students in Tennessee schools was 2.08%, a .2% increase. The number of Hispanic teachers was 0.17%. Twenty-four or 0.45% of the 'new hires' were Hispanic.

American Indian

American Indian students represent 0.16% of the student population of our schools, a decrease of .04% from last year. The classroom teaching staff across the state is 0.08% American Indian unchanged from last year's data. This same population represents 0.11% of the 'new hires' for 2001-02, an increase from last year.

Asian

Tennessee's teaching staff is composed of 0.08% Asian educators and 0.26% of the 'new hires' were Asian. The Asian students in our schools represent 1.2% of students in Tennessee, a slight change from the 2000-01 school year.

Table 14 Classroom Teachers by System and Race gives the complete picture of Tennessee classroom teachers by race.

CONCLUSION

School systems are making strides to increase the number of African American educators and minority educators in Tennessee schools; however, more effort is needed. The number of classroom teachers with 30+ years of experience further emphasizes the accelerated need to establish and implement minority recruitment and retention strategies. The development, implementation, and evaluation of local recruitment and retention plans are needed in order to enhance placement efforts.

Present data collection procedures do not allow for accurate reporting of the number of black educators, both statewide and in individual school systems. The Education Information System, which is currently under development and is in parallel testing, will hopefully increase the accuracy of the data.

In conclusion, Tennessee must continue efforts to attract and retain African American and minority educators. We must also improve data collection to reflect more accurately the number of educators with regard to race and ethnicity.
